Woodland Elementary
779-7775

Snapshots of Our Week

Reading Workshop:

We will review the strategies that readers use to decode words. We know that readers need to "think" while reading and that readers are always asking, "does this make sense?" Next week we will also begin to practice the strategies readers use to construct meaning, such as, predicting, making connections, creating mental images, inferring, and asking questions.

Writing Workshop:

It is publishing week!! Students have decided on a piece they would like to take through the revision process. We will spend next week "fixing and fancying up" our writing. Our next unit is Personal Narratives.

Math Workshop:

Next week we will be working with our additions combinations to solve Addition story problems and then we will move into subtraction.

Unit Study: Light

We begin our study of light. We will look at how light travels, bends, reflects, and refracts through experiments and a fun "Light" mystery on the internet.

There is a note coming home asking for flashlights to use next week.

Coming Attractions

Sept. 27th - PTA Meeting

Oct. 6th - Conference Night

(this night is reserved for teacher requests . . . I will contact you)

Now Featuring: A Two-Thumbs Up Website

Starfall

This website is a nice place to go to find reading activates at many different levels.

FROM THE TEACHER:

If you are interested in being a Mystery Reader in the class, please let me know.

The times are Fridays at 2:30-2:45.

For those of you who travel...we would love to receive post cards from your visits elsewhere! Last year we received lots of post cards from around the U.S. and world!

our address at school is: Mrs. Haynes' class/Woodland Elementary
6923 Dutchland Pkwy. Liberty Twp., OH 45044
